Inter BEE 2006 Power Supply Installation Application

Please apply for the power capacity required in your booth, including the portion covered under free power supply.

Power Mode	Voltage	Frequency	Capacity Applied for
Single-phase 2-wire AC	100V	50Hz	kW
Single-phase 3-wire AC	100V/200V	50Hz	kVA
Triple-phase 3-wire AC	200V	50Hz	kVA

The following power facilities and capacities are available for exhibition booths.

1. Single-phase 100V/200V power facilities:

- (1) Show Management Secretariat provides a single-phase, 100V, 200V, 50Hz power supply (with one power outlet) for each exhibitor in each exhibition category for demonstration and illumination of exhibits.
- (2) Each exhibitor is equipped for 1kW power capacity/booth at no extra charge. However, extra power supply installation is available at the cost of ¥6,825/kW (including consumption tax).

2. Triple-phase 200V power facilities:

Exhibitors can apply for installation of triple-phase 200V power facilities, available at a cost of ¥6,825/kVA power supply (including consumption tax).

Received:

Inter BEE 2006 Application for Over-Regulated Heights and Signboard Construction for Booths at the Rear End of Booth Line

The Secretariat will seal to confirm the receipt of the application and send it back to the exhibitor. Without the application of approval seal exhibitor will not be allowed to exhibit products of over-regulated heights and/or install the below mentioned signboard.

1. Planned exhibits that are over-regulated heights

Exhibitors who would like to exhibit more than one product that is over-regulated heights should specify the information on each product, and attach product leaflet and diagram indicating location and height of product(s) (both floor plan and elevation drawing).

Product name with over-regulated height			
Product measurement	Max. height	m	Max. width
			m

Approved by the Show Management Office	Month Date	Person in charge Seal
--	------------	-----------------------

Product name with over-regulated height			
Product measurement	Max. height	m	Max. width
			m

Approved by the Show Management Secretariat	Month Date	Person in charge Seal
---	------------	-----------------------

2. Signboard construction for booths at the rear end of booth line

In case exhibitors whose booth(s) is located in the final row of the Exhibition Hall (the Southern-end allocation of the Hall) wish to install the special signboard, the signboard size and diagram indicating the location (both floor plan and elevation drawing) should be attached to this application form. Exhibitors are allowed to install up to maximum of three locations.

Signboard setup location

<input type="checkbox"/> 1 signboard at North side of exhibition hall	<input type="checkbox"/> 1 signboard at East side of exhibition hall	<input type="checkbox"/> 1 signboard at West side of exhibition hall
<input type="checkbox"/> 1 signboard at Northeast side of exhibition hall	<input type="checkbox"/> 1 signboard at Northwest side of exhibition hall	<input type="checkbox"/> 1 signboard at _____ side of exhibition hall

Approved by the Show Management Office	Month Date	Person in charge Seal
--	------------	-----------------------

We apply as above.

Notes

1. Diagrams must be submitted by October 6. If diagrams are not received by the deadline, power transmission will be delayed or stopped.
2. Wiring, etc., must comply with the standards set down by the Tokyo Electric Power Company.
3. Appliance capacities must be recorded as follows: fluorescent lighting 40w - FL40w, Lighting 60w - L60w, Socket 100w - ①100w.
4. Fluorescent lighting and mercury lighting, etc., increases the total capacity rating by 50%.
5. Fluorescent lighting and mercury lighting, etc., uses high frequency power. When the use of low frequency power is unavoidable, a condenser should be installed according to the instructions from the Show Management Secretariat.
6. When using a motor, ensure that the condenser installed is suitable for the load-requirement.
7. When using an alternating or dual switch, indicate clearly on the diagram.
8. If it is not possible to include the wiring diagram on this form, use a separate sheet titled "Attached Electrical Power Work Installation Diagram" and submit it together with this Form.
9. The booth must be equipped with a power cut-out switch for safety reasons, and this switch should be located on the rear wall of the booth on the right hand side (when facing the booth) at a height of 100cm from the floor. However, exhibitors who have multiple booths should indicate the location of this switch on the wiring diagram.
10. Murayama Inc. will submit this diagram for the packaged booth.

Early Power Transmission, Transmitting Electricity 24 Hours and Extending Power Transmission Application

1. Early Power Transmission

Power for exhibitors with 14 booths or more will be activated at 1:00 p.m., Monday, November 13; for exhibitors with 12 booths or less at 10:00 a.m., Tuesday, November 14. The early power transmission requires separate installation work, so, all costs should be borne by the exhibitor. In some cases, we may not be able to accept requests due to working conditions.

Date preferred for beginning of power transmission	Date: November _____ Time: From _____ a.m./p.m.
Additional request (specify)	

2. Transmitting Electricity 24 Hours

Each piece of equipment should be single wiring. The Show Management will not take any responsibility for managing this equipment.

Dates preferred for transmitting electricity 24 hours	Name of the equipment	Voltage	Electric Capacity
November ____ to ____		100V	W
November ____ to ____		100V	W
November ____ to ____		200V	VA(W)
November ____ to ____		200V	VA(W)

3. Extending Power Transmission

Power transmission will be stopped at 5:15 p.m., Friday, November 17. Exhibitors requiring an extension should fill in the below information and submit it to the Show Management Secretariat.

Time preferred for stopping power transmission	Date: November 17 Time: Till _____ p.m.
Additional request (specify)
