VTX-V20

VTX-V20 is the latest model in "VTX series" of [JBL PROFESSIONAL] flagship line array speakers. The compact three-way with two ten-inch woofers output overwhelming acoustic pressure that exceeds previous standards. VTX-V20 has also excellent lower distortion and directional control, so it is possible to deliver the acoustic pressure required for given areas with the minimum cabinet volume. VTX-V20 is equipped with the newly developed D2 dual compression driver that comes with unparalleled reproducibility at high frequencies. These are speakers perfect for mid-sized venues that require the highest grade acoustic quality.

System Configuration
