

Product

MINA

The feature and concept common to Meyer Sound products is "neutral." The self-powered system is power efficient and space saving, and simplifies the system design and integration. MINA is the smallest model in the line array series of Meyer Sound. One 3-inch compression driver and two 6.5-inch cone drivers mounted on REM. MINA is a 2-way system and houses a 3 channel Class-D amplifier with 975 Watts of output. The crossover point is 760 Hz and the maximum peak SPL is 128 dB. As a subwoofer system for the upcoming demo, Stacked Cardioid arrangement is planned using two 500-HPs on one side.

System Configuration

	Product Name	Manufacturer	Model Number
Speaker	MINA	Meyer Sound	MINA
Subwoofer	500-HP	Meyer Sound	500-HP
Amplifier	built-in		
Processor	Galileo 408	Meyer Sound	Galileo 408
