

Product **Anya System**

Anya – the new EAW flagship model – is an innovative speaker system that will go out in front of traditional line array speakers. The “Anya” module that is suspended vertically is optimized based on the conditions for which these characteristics have been defined by the user through the Adaptive Performance™ technology to achieve consistent acoustic pressure and sound quality at any location in the coverage area. “Anya” refers to a speaker system that exhibits optimal performance under any conditions.

System Configuration
