

Product

LA12 LA12 3-Way line array module

The LA12 is equipped with CODA's specific driver in the mid/high-frequencies using their patented outstanding technology to create the clarity & sensitive sound without any distortions and this technology allowed users to produce the high output power to support large-scale sites. The SC8 subwoofer reproduces the original sound source precisely according to their unique technology "Feedback Loop Control" to achieve a masking effect and group delay suppression. Furthermore, the SC3 base extension reproduces clear low frequencies so high clarity sound is supported together with the LINUS linear phase system in all bandwidths simultaneously.

System Configuration

	Product Name	Manufacturer	Model Number
Speaker	3 Way Line Array (Flying) + Bass Extension	CODA AUDIO	LA12 3 Way Line Array) SC3-F Bass Extension
Subwoofer		CODA AUDIO	SC8-F
