INTER BEE DX × IP PAVILION

Through 'collaboration' across company boundaries we propose the possibilities of 'DX in content production'

Overview

Companies are invited to participate in advance preparations and booth deployment for the INTER BEE DX x IP PAVILION. Upgrade from IP PAVILION, which fully utilised Media over IP technology and proposed "system sharing" methods. By incorporating the new themes of 'AI', 'Cloud' and 'Security' into the main theme of 'IP', we aim to develop a booth that proposes more efficient next-generation content production.

Participation Requirements

- Companies/organisations that will participate from the planning and consideration stage and promote the project by sharing the responsibility.
- Companies/organisations that are willing to provide actual equipment, explanatory panels, personnel, etc. for the actual equipment connection demonstrations at INTER BEE DX x IP PAVILION.

*When exhibiting equipment, only equipment related to any of the following and in actual operation under certain conditions may be exhibited.

- Equipment and services that support Media over IP technology (ST 2110, ST 2059, NMOS), AI services that can be used for
- Cloud services (X as a Service) that can be used for content production and transmission
- Equipment and services that enable network security measures for broadcasting
- Security consulting services and seminar services for the broadcasting industry (e.g. the three principles of information security).
